

[illegible]

The screenshot displays a web application interface for managing a collection. At the top, there is a navigation bar with a 'W' logo, a search input field, and a 'G+' button. The main content area is divided into two sections. The top section features a 'Picture' placeholder, a 'Position' label, a 'Description' label, and a 'Notes' label. To the right of these labels is an 'Edit|Delete' button. Below this section, there are two circular buttons labeled 'x'. The bottom section is a large rectangular area containing a 'List or cards view of contents (containers, items, or both - controlled by radio buttons in top right)' and a message 'This area disabled when editing'. The interface is designed with a clean, modern aesthetic using a light gray color scheme.
